Space: NASA Must Reconsider Operations Pricing Policy to Compensate for Cost Growth on the Space Transportation System: Masad

By -

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 80 pages. Dimensions: 9.7in. x 7.4in. x 0.2in. GAO reviewed the National Aeronautics and Space Administration (NASA) pricing policy and operating cost for the Space Transportation System (STS) to determine the overall effect that STS cost increases would have on future NASA budget requests and on its other research and development. GAO found that, based on estimated future costs, NASA established a 3-year, 18 million fixed price for commercial, foreign, and other U. S. agencies launches and a 6-year, 12. 2 million fixed price for the Department of Defense (DOD) launches. The price is to be adjusted annually to recover total operations costs. The projected average costs to fly a space shuttle mission have increased 73 percent. NASA must fund the full cost of its flights and the difference between the actual cost per flight and the reimbursements received from users, until the price charged to them becomes more than the actual costs and provides funds to the government. It is currently estimated that NASA could pay 80 percent of the shuttle operations costs while flying 36 percent of the flights. A minimum of 62 percent of the NASA...

Reviews

Undoubtedly, this is the best work by any author. It is really simplified but shocks within the 50 % in the publication. Its been written in an extremely straightforward way and is particularly just following i finished reading this publication by which basically altered me, modify the way in my opinion.

-- **Vivianne Dietrich**

This is the very best book i actually have read till now. It is loaded with knowledge and wisdom I am just easily could get a satisfaction of reading a created ebook.
