From the blurb: "Before Darwin, before Audubon, before Gilbert White, there was Merian. An artist turned naturalist, Maria Sibylla Merian was born in Germany just 13 years after Galileo was prosecuted for proclaiming that the earth orbited the sun. But in 1699, at the age of 52, she sailed from Europe to the New World on an expedition to study metamorphosis. It was an unheard-of journey for any naturalist at the that time, much less a woman, but Merian undertook it undaunted with only her daughter for company".
