

Laboratory Directions for Elementary Botany (Classic Reprint)

By James Barkley Pollock

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Laboratory Directions for Elementary Botany This manual is the product of twenty five years experience in teaching elementary botany to students in the University of Michigan. At the beginning of that period the author started with a similar manual used by his predecessors and associates, the late Professor Volney M. Spalding, of revered memory, and Professor Frederick C. Newcombe. The outline of work has undergone considerable change since the time when the writer was given charge of the elementary course in botany at this institution. For these changes he has been largely responsible. As the students increased in numbers other men have cooperated in giving the laboratory work and lectures, and in the most recent years numerous discussions have been carried on as to how the course could be improved. Among those taking part in these discussions have been H. H. Bartlett, R. M. Holman, B. M. Davis, W. W. Tupper and others. The work outlined is essentially that now given at this University, but the present edition contains some material not previously included in...
