

Tackling Noncommunicable Diseases in Bangladesh: Now Is the Time

By Sameh El-Saharty

World Bank Publications. Paperback. Condition: New. 136 pages. Dimensions: 9.9in. x 6.8in. x 0.5in. Bangladesh is undergoing a double transition demographic and epidemiological. Increasing life expectancy and declining fertility entail a demographic transition fueling a shift in the disease burden toward noncommunicable diseases (NCDs). Yet due to absence of a robust routine health information system in the country, it is hard to accurately assess the disease burden and corresponding risk factors. So, using a wide range of sources, this book looks at the status of major NCDs in Bangladesh (and briefly in South Asia), touches on their economic impact, analyzes their common risk factors, and assesses the health systems capacity to manage the disease transition. In a country where total health spending is low 23 a head per year, two-thirds of it private the main constraints on the health system are a weak regulatory framework; lack of strategic planning and coordination across sectors; lack of alignment between the goals of health strategy documents and the operational plans; a focus by the health system on treatment, not prevention; and a fragmented health service delivery system, leading to a lack of coordinated care critical for effectively managing NCDs. This book aims to help policy makers inside and...
